PROFESSIONAL SUMMARY

Full Stack Developer with 4+ years of experience and a primary focus on Node.js/TypeScript, working across both back-end and front-end. I build multi-tenant SaaS products, FinTech platforms, CRMs and AI solutions in production, with Node.js and NestJS at the core and React/Next.js on the front end, complemented by Python and .NET (C#) depending on the project. Solid experience in microservices, DDD/SOLID, CI/CD and serverless and containerized environments (Docker, Kubernetes), plus RAG and AI agents. I design, build and operate my own SaaS products with real clients, which gives me product vision and ownership over the entire application lifecycle.

PROFESSIONAL EXPERIENCE

Sttart Pay (Financial Operations) | Full Stack Developer, Mid-level (Contract) Feb/2026 to Present

- Developed serverless back-end services in Python/AWS Lambda for financial operations (PIX, TED, card machines and USD), supporting a continuous transaction flow, 24 hours a day.
- Led the team's code review and organized the project's sprints and releases, leading the team.
- Focused on performance, security and scalability in the integration of critical financial systems.

Freelance Full Stack Developer (Self-employed / Contract) May/2024 to Present

- Conceived and operate my own multi-tenant SaaS products in production with paying clients, working end to end (from requirements gathering to deployment and maintenance), alongside contract engagements.
- Build custom B2B solutions for companies seeking a more personalized product or a stable internal system, with long-term support provided by me and my development and marketing team.
- Build automations and third-party API integrations with N8N, from concept to delivery and ongoing maintenance.

CRM Datacrazy | Full Stack Developer, Mid-level (Contract) Feb/2023 to Feb/2026

- Promoted from Junior to Mid-level in 2025 after consistent work in microservices architecture and quality deliveries.
- Developed interfaces in React/Next.js and REST APIs in Node.js, NestJS and C# (.NET), applying DDD and SOLID.
- Implemented integrations with Meta external APIs (WhatsApp and Instagram) and automated tests with Jest.
- Built and maintained CI/CD pipelines with Docker, Kubernetes, GitHub Actions and Azure DevOps.

FCS, Fluxo de Caixa Simples (AR Digital Labs) | Full Stack Developer, Junior (Contract) Jun/2024 to Jan/2025

- Developed critical financial applications with React/Ant Design on the front end and C# (.NET Core) serverless (AWS Lambda) on the back end.
- Optimized SQL queries, improving application performance and stability.
- Set up CI/CD pipelines in Azure DevOps.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, C#, Python

Full Stack Development: Node.js, NestJS, Express.js, React, Next.js, REST APIs, .NET Core, C#, Django, Tailwind CSS, Ant Design

Data & ORMs: PostgreSQL, MySQL, MongoDB, Redis, Prisma ORM, TypeORM

DevOps & Cloud: AWS (Lambda, S3), Azure DevOps, Docker, Kubernetes, GitHub Actions, Google Cloud, CI/CD, Git

AI & Automation: LLMs (OpenAI, Anthropic), RAG, AI Agents, NLP, N8N

Architecture & Quality: DDD, SOLID, Microservices, Serverless, Automated testing (Jest)

RELEVANT PROJECTS

Coldmail | Multi-tenant SaaS in production

- Cold email mass sending and warm-up platform. Stack: Next.js, NestJS and N8N. In production with 3 fixed paying clients, processing over 3,000 emails per week. coldmail-bg-ia-labtracker.vercel.app

BT Barber | Multi-tenant SaaS in progress

- SaaS for barbershops with 3 interfaces (client, barber and manager) and an integrated e-commerce module, a first in the segment. Stack: Next.js (full stack) and AWS S3. Project in progress, with 10 barbershops ready to start. bt-barber.vercel.app

AI agents for banking services | Personal project

- Customer service system with 4 AI agents that switch seamlessly for the user (credit limit inquiry, limit increase, currency quotes and financial profile). Stack: Python, RAG, knowledge bases and direct OpenAI integration. ia-agent-tech-for-humans-frontend.vercel.app

EDUCATION

Bachelor's Degree in Systems Analysis and Development | Estácio *Completed Jul/2024*

Focused on programming logic, object-oriented programming, databases, software engineering and web development.

Full Stack Web Development Program | Kenzie Academy

Intensive course focused on JavaScript, React, Node.js, REST APIs, automated testing and development best practices.

LANGUAGES

Portuguese: native.

English: advanced, with **C2 certification (EF SET)**. Active conversation practice, built on a 2-year course at The Place and ongoing use of the Cambly platform.
