PROFESSIONAL SUMMARY

Full Stack Developer with 4 years of experience in FinTechs, CRMs, and Artificial Intelligence solutions. Focus on microservices architecture, system integrations, automations, and CI/CD pipelines. I maintain my own multi-tenant SaaS products in production serving paying clients, in parallel with contract roles at financial sector companies.

PROFESSIONAL EXPERIENCE

Sttart Pay – Financial Movements – Full Stack Developer, Mid-Level (Contract) – Feb/2026 – present

Working at a FinTech specialized in diverse financial transactions, including PIX (Brazilian instant payments), TED (wire transfers), card processing, and USDT (cryptocurrency) operations. Development of back-end applications in Python, creation of serverless services with AWS Lambda, and configuration of CI/CD pipelines with Azure DevOps. Focus on performance, security, scalability, and integration between financial systems.

Full Stack Developer Freelancer (Self-employed/Contract) – May/2024 – present

Development of multi-tenant SaaS products and various solutions for companies across different segments, including web applications, automations with N8N, system integrations, and AI solutions. Full project lifecycle from requirements gathering to deployment and maintenance. Contribution to development teams in complex projects.

CRM Datacrazy – Full Stack Developer, Junior → Mid-Level (Contract) – Feb/2023 to Feb/2026

Promoted to Mid-Level in 2025 after consistent work in microservices architecture and quality deliverables. Development of web interfaces with React and Next.js, creation and maintenance of REST APIs with Node.js, NestJS, and C# (.NET). Participation in microservices architecture design, applying DDD and SOLID. Implementation of integrations with external APIs such as WhatsApp and Instagram. Development and maintenance of automated tests with Jest. Configuration and maintenance of CI/CD pipelines using Docker, Kubernetes, GitHub Actions, and Azure DevOps. Contribution to the development team on internal projects.

FCS – Fluxo de Caixa Simples (AR Digital Labs) – Full Stack Developer, Junior (Contract) – Jun/2024 to Jan/2025

Working at a FinTech focused on business financial management, with development of critical financial applications, implementation of interfaces with React and Ant Design, creation of back-end services in C# (.NET Core) with serverless processing via AWS Lambda, and configuration of CI/CD pipelines with Azure DevOps. SQL query optimization for performance and stability.

RELEVANT PROJECTS

Coldmail – Multi-tenant SaaS in production

Platform for cold email outreach and email warming at scale. Stack: Next.js, NestJS, and N8N for automations and integrations with external APIs. In production with 3 recurring paying clients. URL: <https://coldmail-bq-ia-labtracker.vercel.app>

BT Barber – Multi-tenant SaaS in testing phase

SaaS for barbershops with 3 specialized interfaces: client (booking and integrated checkout), barber (schedule management), and owner (administrative dashboard). Includes a store module for product sales, an unprecedented feature in the segment. Stack: Next.js (full stack) and AWS S3 for media storage. Currently in testing phase, with 1 active client in real use and 3 waiting for launch. URL: <https://bt-barber.vercel.app>

AI Agents for Banking Services – Technical Test

Customer service system with 4 specialized AI agents that switch transparently to the user: credit limit consultation, credit limit increase requests, currency exchange rates, and financial profile updates. Stack: Python, RAG (Retrieval-Augmented Generation), knowledge bases, and direct integration with OpenAI. URL: <https://ia-agent-tech-for-humans-frontend.vercel.app>

SKILLSET

Languages: JavaScript, TypeScript, C#, Python

Front-end: React, Next.js, HTML5, CSS3, Tailwind CSS, Ant Design

Back-end: Node.js, NestJS, Express.js, .NET Core, Django, REST APIs

Databases & ORMs: PostgreSQL, Postgres, MySQL, MongoDB, Redis, ORM, Prisma ORM, TypeORM

DevOps & Cloud: Azure DevOps, Docker, Kubernetes, GitHub Actions, AWS (Lambda, S3), Google Cloud, CI/CD, Git

Architecture: DDD, SOLID, Microservices, Serverless

Testing: Jest

AI & Automation: LLMs (OpenAI, Anthropic), RAG, AI Agents, NLP, N8N

Domain: FinTech, SaaS, CRM, Messaging, Meta Integrations (WhatsApp/Instagram)

EDUCATION

Bachelor's in Systems Analysis and Development – Estácio – Completed in Jul/2024

Studies focused on programming logic, object-oriented design, databases, software engineering, and web development.

Full Stack Web Development Program – Kenzie Academy

Intensive course focused on JavaScript, React, Node.js, REST APIs, automated testing, and development best practices.

LANGUAGES

Native Portuguese. Intermediate English, with 2 years of English course at The Place and active conversation practice on Cambly for the past 6 months.
