PROFESSIONAL SUMMARY

Full Stack Developer with 4+ years of experience building technology and SaaS solutions for FinTech, CRM and AI companies, working from requirements gathering to deployment and production maintenance. Specialized in microservices architecture, multi-tenant applications, system integrations and CI/CD pipelines. I currently contract for Pay Theory, a US payments infrastructure FinTech (Ohio, USA), working remotely and 100% in English (C2 certification - EF SET). I run my own multi-tenant SaaS products in production with 4 paying customers and provide services to companies in São Paulo state.

PROFESSIONAL EXPERIENCE

Pay Theory (Ohio, USA, remote) - QA & DevOps Engineer (Contractor)

May/2026 - present

- US payments infrastructure FinTech (payments-as-a-service) for software platforms, in a regulated environment.
- E2E and integration test automation with Playwright over serverless services on AWS, ensuring release quality and reliability.
- Integration of E2E test suites into CI/CD pipelines and test coverage for new product features.
- Application of AI agents to engineering and testing workflows.
- Work 100% in English with a distributed team in the United States: meetings, documentation and written communication.

Stack: TypeScript, JavaScript, Playwright, AWS, CI/CD, AI Agents

Sttart Pay - Financial Transactions - Mid-level Full Stack Developer (Contractor)

Feb/2026 - Jul/2026

- FinTech for financial transactions: PIX, TED, card readers and USDT (cryptocurrency) operations.
- Back-end services in Python on AWS Lambda, with CI/CD on Azure DevOps in a regulated environment.
- Focus on transaction validation, retry with backoff, observability and security of the financial core.

Stack: Python, AWS Lambda, Azure DevOps

CRM Datacrazy - Junior to Mid-level Full Stack Developer (Contractor)

Feb/2023 - Feb/2026

- Took part in building, from scratch, a multi-tenant CRM with microservices architecture (DDD and SOLID) and a multi-channel support inbox integrated with WhatsApp Business, Instagram and other channels.
- Built, as part of a team, automations and AI agents for real-time chat support.
- Promoted from Junior to Mid-level in 2025 for delivery consistency and technical merit.
- Development of REST APIs with Node.js, NestJS and C# (.NET) and of interfaces with React and Next.js.
- Automated testing with Jest and CI/CD pipelines with Docker, Kubernetes, GitHub Actions and Azure DevOps, including smoke tests in staging.

Stack: React, Next.js, NestJS, C# (.NET), Kubernetes, Docker

FCS - Fluxo de Caixa Simples (AR Digital Labs) - Junior Full Stack Developer (Contractor)

Jun/2024 - Jan/2025

- FinTech for corporate financial management aimed at SMBs: cash flow, reconciliation and reporting.
- Serverless back-end in C# (.NET Core) on AWS Lambda, with cold start mitigation via warm-up scheduler.
- React interfaces with Ant Design; SQL query refactoring with index analysis and N+1 fixes on critical dashboards.

Stack: .NET Core, React, AWS Lambda, SQL

KEY PROJECTS

Coldmail - Multi-tenant SaaS in production

Large-scale B2B cold mailing platform with automatic domain warm-up, conversion funnel analytics dashboard and intelligent lead classification. In production with 3 recurring paying customers.

Stack: Next.js, NestJS, PostgreSQL, N8N, Redis | coldmail-bg-ia-labtracker.vercel.app

ADV-IA - Multi-agent AI system for law firms

System with multiple specialized AI agents for law firms: contract drafting and review, monitoring of legislative changes, answering client questions and sending weekly reports to lawyers, with orchestration and routing between agents.

Stack: N8N, LLMs (Anthropic), RAG, WhatsApp and email integrations

Banco Ágil (AI Agents) - Multi-agent RAG architecture showcase

Banking support system with 4 specialized AI agents that take over from one another transparently to the user: triage, credit analysis, currency quotes and financial profiling. RAG architecture with OpenAI, knowledge bases and contextual conversational routing between agents.

Stack: Python, FastAPI, RAG, OpenAI, Next.js | ia-agent-tech-for-humans-frontend.vercel.app

SKILLSET

Languages: TypeScript, JavaScript, Node.js, Python, C#

Front-end: React, Next.js, Tailwind CSS, shadcn/ui, Ant Design, HTML5, CSS3

Back-end: NestJS, Express.js, .NET Core, Django, REST APIs

Testing & QA: Playwright (E2E), Jest, integration testing, test automation in CI/CD

Databases & ORMs: PostgreSQL, MySQL, MongoDB, Redis, Prisma, TypeORM

DevOps & Cloud: AWS (Lambda, S3), Docker, Kubernetes, GitHub Actions, Azure DevOps, Google Cloud, CI/CD, Git

Architecture: Microservices,DDD, SOLID, Serverless, Multi-tenancy

AI & Automation: LLMs (OpenAI, Anthropic), RAG, AI Agents, N8N

Domain: FinTech, Payments, SaaS, CRM, Messaging, Meta Integrations (WhatsApp/Instagram)

EDUCATION

Bachelor's Degree in Systems Analysis and Development - Estácio

Completed in Jul/2024

Program focused on programming logic, object-oriented programming, databases, software engineering and web development.

Full Stack Web Development Program - Kenzie Academy

Intensive program with over 3,000 hours of live classes and weekly project deliveries, focused on JavaScript, React, Node.js, REST APIs, automated testing and development best practices.

LANGUAGES

Portuguese: native.

English: advanced - C2 Proficient certification (EF SET). Daily professional use at a US company: meetings, documentation and written communication 100% in English. Certificate: cert.efset.org/pt/VJSXfm.
